STleST, RUN and GROW
with Sun Software.

APAC Extended Horizons Summit 2008

Business and technology professionals collaborating in an information-packed two day summit and workshops.

You are invited to join us and your peers at APAC Extended Horizons 2008 to find out how the latest in Sun Software can help solve your business problems.

Who Should Attend

Senior business and technical professionals who architect, design, implement, deploy and manage software solutions using the following technologies:

> Sun Java™ Composite Application Platform Suite
> Sun Java™ Enterprise System
> Sun Java™ Identity Management Suite
> Sun Java™ Global Desktop, SunRay™ server, virtualbox and management of virtual environments
> MySQL®

Benefits

START to effectively implement and deploy services quickly and easily

RUN your business on a reliable and secure software platform

GROW the communities that connects to your business quickly and with any device from anywhere in the world.

Following its smashing success last year, the Extended Horizons Summit is back for a thirteenth consecutive year, with a bigger and more insightful two-day summit plus pre-event workshops.

The summit agenda is designed for you to:

> Explore ROI benefits from real world deployments
> Gain insight into managing and mitigating risks of complex deployments
> Get the latest developments and insider tips directly from technology innovators
> Learn new techniques, best practices, explore blueprints, governance processes and successful strategies for implementation and deployment
> Participate in workshops, technical deep dives and solution sessions
> Network with your peers and exchange knowledge

The summit features three parallel streams - business, technology, deep-dive technical sessions - plus two pre-event workshops.

When

Workshops   Sunday 25 May 2008
Conference   Monday 26 and Tuesday 27 May 2008
Novotel, Brighton Le-Sands, Sydney, Australia
